

DOCUMENT DELIVERY SYSTEM FOR AUTOMATICALLY PRINTING A DOCUMENT ON A PRINTING DEVICE

ABSTRACT

5

A method for printing one or more documents operatively coupled to a printing device is presented, the method comprising issuing a request to retrieve one or more documents from an associated one or more providers in response to an indication received from a user. Receiving the requested one or more documents in a print manager operatively coupled to the printing device, and printing the retrieved one or more documents from the printing module, without invoking an application associated with the one or more documents, or otherwise displaying the one or more documents to the user.
